Leading companies.
Leading solutions.

PASE GROUP, INC. DELIVERS NEW AUTOMATIC ADHESIVE A-B FILLING MACHINE.

This automatic 4-head, A-B filler design accommodates practically any open top container up to 5 gallons. To keep the material moving, flow alternates between filling on one lane while new containers index into the other lane. Custom formed heat tracing provides for precise temperature control so material flows smoothly without being overheated.

PASE Group, Inc also incorporated an easy to use graphical display. The display provides operators with real-time line status so production needs can be diagnosed quickly with minimal downtime. For more details, please call us at 952-746-1091, e-mail us at sales@pasegroup.com, or visit our web site at www.pasegroup.com.

AUTOMATIC F-STYLE CONTAINER FILLER INCREASES SPEED WITH NEW NOZZLE DESIGN.

Here's a slick net-weight filler setup for your F-Style containers. Quick change nozzles enable the operator to vary the size of the nozzle to fit the size of the container mouth resulting in faster more accurate fill rates.

Fill head spacing and nozzle design can be customized to fit your containers. Fill head quantity can be varied to meet your fill rate needs. POP (Pressure-Over-Product) filler tanks can be pressurized with a blanket of inert gas to protect products that are sensitive to oxygen. For more details, please call us at 952-746-1091, e-mail us at sales@pasegroup.com, or visit our web site at www.pasegroup.com.

PASE GROUP, INC. INTRODUCES NEW MIXING HEAD FOR PORTABLES.

Use net-weight filling technology to produce consistent portable batches. Each of the 15 filling heads is capable of delivering the same precision as a small net weight filler. In addition, this design can be customized to accommodate more heads if needed. For more details, please call us at 952-746-1091, e-mail us at sales@pasegroup.com, or visit our web site at www.pasegroup.com.
