- Latest in display PASE software and technology.
- Pressure over Product multi head filler.
- We will have one of our filling machines on display.
- Auto indexing Lid dropper with High Capacity magazine.

PASE SHIPS IT'S 3 HEAD FIVE GALLON FILLER

PASE Group Inc. has delivered on a 5 gallon filler utilizing its pressure over product design. This 3 head filler is utilizing our state of the art pressure over product carts (2 each on this system) for infinite filling control of multiple product viscosities and types on the same line. Capable of producing 16 to 18 5 gallon containers per minute, this system is a leading contender in the filling industry. Allen Bradley panelview 1000 graphics insure easy to understand controls and an options that facilitate everyone from the operator to management. We provide menu's that make set up easy, and provide trending and filling data that management can use to keep track of production performance. Provided with the filler (as with all of our fill equipment) is a self contained cleaning and flushing tank system that combined with our software, makes the pigging and cleaning of our permanently connected filling stations an automatic procedure. While one filling station is filling product, the other fill station is running the automatic self cleaning program at the flushing station. This is all controlled on one menu screen. This automatic operation is all done without the labor and time spent disconnecting and reconnecting carts. The flush station and carts are mobile and easy to position. It's an ideal scenario that saves time and money!

Flush Station for Continuous Cleaning!

PASE Group supplies with its fillers a time saving flush station for cleaning of the product tanks. This unit is self contained, vented, and can be used for cleaning of just about any filling manifold or cart system. It re-circulates the cleaning solution with the onboard pump for a continuous cleansing of the fill heads. . Minimal foot print allows easy integration into the floor plan. Call us for more information.
